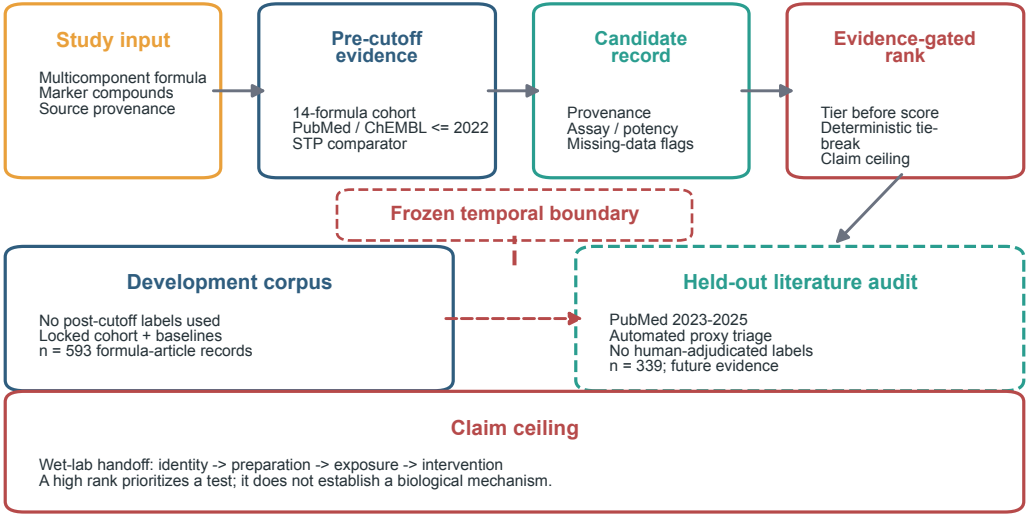
A



Study input
Multicomponent formula
Marker compounds
Source provenance
Pre-cutoff evidence
14-formula cohort
PubMed / ChEMBL <= 2022
STP comparator
Candidate record
Provenance
Assay / potency
Missing-data flags
Evidence-gated rank
Tier before score
Deterministic tie-break
Claim ceiling
Frozen temporal boundary
Development corpus
No post-cutoff labels used
Locked cohort + baselines
n = 593 formula-article records
Held-out literature audit
PubMed 2023-2025
Automated proxy triage
No human-adjudicated labels
n = 339; future evidence
Claim ceiling
Wet-lab handoff: identity -> preparation -> exposure -> intervention
A high rank prioritizes a test; it does not establish a biological mechanism.
